

SSPRS

2-FA SELF SERVICE PASSWORD RESET AND PROFILE MANAGER

SSPRS HIGHLIGHTS

- SSPRS reduce administrators' heavy workload:
 - 69% of users forget their passwords, leading to frequent manual password reset requests ^[1].
- SSPRS eases the difficulty in enforcing corporate password policies:
 - Most users do not change their assigned default corporate password while 64% of users write their passwords on security-compromising sticky notes or papers ^[2].
- SSPRS provides a secure password reset process that administrators can monitor.

FEATURES

- 24/7 user-initiated password reset facility:
 - Reduced workload for administrators.
 - Reduced dependency on sticky notes or papers.
- Easily enforced corporate password policies through automation. Such policies include:
 - Specifying password length.
 - Setting password complexity (alphanumerics and mixed cases)
 - Maintaining password blacklist.
 - Maintaining user blacklist.
 - Disallowing username used in password.
 - Controlling user's daily limit usage.
- A secure password reset process that stores all log trails.
- A secure facility for administrator to manage Microsoft Active Directory objects:
 - Create, update, delete and view users.
 - Manipulate LDAP parameters for SSO.
 - View usage statistics.
- Store passwords in a secure personal vault:
 - All passwords and notes are stored safely in user's vault that is easy-to-use, searchable and organized.
- Generate random passwords:
 - The built-in password generator will create long, randomized passwords for your users.
- Audit user passwords:
 - The Password Posture Check will detect weak, duplicate, old and vulnerable passwords stored in the vault.
- Reminder for password change:
 - It will periodically remind and direct the user to change the password without hassle.
- Provide solution for forgotten username:
 - It allows user to retrieve their username.
- Keep digital records with secure notes:
 - Stores phonebook, insurance information, membership details, medical prescriptions, WiFi logins and more.
- Profiles for online shopping:
 - Creates personal profile for every online credit card and payment information.
- Two (2) step operation using 2-FA and challenge code:
 - PIN code via SMS.
 - PIN code via email.
 - PIN code via Telegram messenger.

ORDERING INFORMATION

ORDER CODE	DESCRIPTION
SS-01A	Virtual Appliance
SS-02A	Password reset module for Windows
SS-03A	Password reset module for Linux
SS-04A	Password reset module for custom web application
SS-05A	Password reset module for custom desktop application
SS-06B	Annual on-call support (year 2 onwards)
SS-07B	Annual software upgrade and patches (year 2 onwards)
SS-08C	Physical appliance (optional)
SS-10D	2500 user's license
SS-11D	1000 user's license
SS-12D	100 user's license
SS-13E	Annual support hardware parts and replacements (optional year 2 onwards) 9 am to 5 pm service. Same business day, remote or onsite.

- Virtual Appliance (order code SS-01A) includes:
 - Perpetual User License.
 - Virtual SMS Kit.
 - LDAP Password Reset Module.
 - Microsoft Active Directory Password Reset Module.
 - User Password and Profile Manager Module.

* Contact our sales representative for specific or unlimited users license.
* All products, product specifications and data are subject to change without notice to improve reliability, function or design or otherwise.
